

Product Guide

High Impact

Mainline's High Impact range of shelf life boilies offer the modern-day angler a complete food source bait of the highest calibre. Combining our experience and research of high-quality base-mix ingredients with our latest and most exclusive liquid additives - these boilies simply breathe excellence in forming a complete food source bait.

Packaged in our 1kg or 3kg 're-sealable' bags to maintain freshness there are eight flavours available in sizes 15mm and 20mm:

• **Spicy Crab** • **Banoffee** • **High Leakage Pineapple** • **Essential IB**
• **Salty Squid** • **Peaches & Cream** • **50/50 Fruittella** • **Diamond Whites** •

Made using ingredients of the highest quality, the Mainline High Impact range of pop-ups provide the angler with reliably buoyant hookbaits to suit a multitude of rig presentations.

By utilising the same exclusive liquid additives used throughout the High Impact range of bait, these pop-ups can not only be used in conjunction with matching boilies, but can also be used as a high-attract hookbait in a number of other fishing situations such as single hookbait fishing.

Available in tubs of approx. 50 baits:

• **Spicy Crab** • **Banoffee** • **Essential IB** • **Salty Squid** • **Diamond Whites** • **High Leakage Pineapple** • **Peaches & Cream** • **50/50 Fruittella** •

Our 'Wafter' hookbaits have been designed and extensively tested to provide the modern-day angler the ability to create 'critically-balanced' hookbait presentations – quickly and easily. Simply thread the hookbait onto a Hair Rig and the weight of the rig hook will counterbalance the slow sinking buoyancy of the 'Wafter' perfectly!

Combined with the High Impact range of liquid flavours and additives – the result is a selection of highly attractive hookbaits with advanced performance and hooking potential!

Wafter/Hook Ratio: 12mm/Sz8 15mm/Sz6 18mm/Sz4

Available in tubs of approx. 50 baits in 12mm, 15mm and 18mm sizes:

• **Banoffee** • **Essential IB** • **Spicy Crab** • **Salty Squid** • **Peaches & Cream** • **50/50 Fruittella** • **Diamond Whites** • **High Leakage Pineapple**

Available in 22mm:

• **Banoffee** • **Spicy Crab** • **Diamond Whites**

Dedicated Base Mix Balanced Wafers

The NEW Mainline Wafer hookbaits have been designed to deliver an advanced edge to the performance of your rig presentation without complexity. Simply thread a Wafer onto your chosen Hair rig and allow the weight of your hook to set the slow sinking Wafer into a 'critically-balanced' position...

After a long and extensive testing period we have been able to combine our unique Wafer mix with our most popular dedicated freezer bait flavours. This provides the modern day the ability to fish balanced hookbaits, poised to react to any carp investigation – turning more bites into secure hook holds and landed fish!

Wafer/Hook Ratio: 12mm/Sz8 15mm/Sz6 18mm/Sz4

(Guideline only - Check rigs prior to fishing. Add counterbalance where necessary as hook weights may vary)

Sizes 12mm, 15mm and 18mm available in 250ml tubs of approx. 50 baits:

• Hybrid • Cell • Essential Cell

The design of the Bag & Stick mixes is built on Mainlines extensive knowledge & experience in bait formulation. Incorporating a unique water soluble catalyst system, which capitalises on all aspects of feeding & attraction. Pro-active stick & bag mixes are the ultimate in active particle release and provide a stream of attraction throughout the water column, drawing carp from all levels. Ideally suited for filling PVA sticks and bags, but can also be used as an addition to any Groundbait or spod mix.

Available in 1kg bags:

- **Crushed Tiger Nut** • **Crushed Hemp** • **Cloud9** • **Cell**
- **Bloodworm stik pellets** • **Salty Chilli Fish** • **Hybrid** • **Essential Cell**

All our products and ingredients are of the highest quality human food grade. Only the finest ingredients are used, they are being shipped from as far afield as Japan, New Zealand and Scandinavia. Everything is packed in the best-laminated foiled bags to ensure that the product remains fresh and top quality at all times. Amino based powdered enhancers and palatants have been added, which not only serve to attract but also give the bait a 'round' taste to complement the initial attraction.

Mainline baits are tailored to be instantly acceptable, but the long life of bait is a vital ingredient of their success. Our mixes are consistently successful throughout a season and even season to season, which is important when you consider the time, money and effort spent on baiting campaigns.

Available in 1kg bags and 10kg buckets:

- **The New Grange** • **The Cell** • **Essential Opal** • **The Fusion** • **Essential Cell**
- **Activ-8** • **Essential Fish** • **High Leakage 50/50** • **Hybrid** • **Polaris Pop Up Mix**

The New Grange

Probably the most complete carp food ever made.

Underneath the unique savoury taste and active profile is a bait that provides the carp with their entire dietary requirements. Utilising our exclusive protein source ingredients and the triggers that made the original grange so outstanding we truly believe we have created a new 'Super-bait' set to take the angling world by storm. The New Grange is designed to not only stimulate, but to sustain, the feeding responses of carp in all water temperatures. To be used with the New Grange Activator

The Fusion

This is without doubt the most complex H.N.V style bait we have developed to date. The combination of two reactionary components, one dry and one liquid, insure easy access to the nutritional and energy aspects of this product and ensure its effectiveness time and time again - A fishy-meaty-savoury aroma and low in oil content, reddish brown in colour. To be used with the Fuze Activator.

The Cell

A TOTALLY NEW CONCEPT IN BAIT FORMULATION. The Cell is a completely different type of bait to everything that has gone before it. The Cell is not a milk protein, fishmeal or bird-food based bait, it is the next step in nutrition technology. It is designed to provide a protein source that is easier for carp to convert than fishmeals and bird-foods, provoking a sustained feeding response in all water temperatures. To be used with the Cell Activator.

Essential Cell

Essential Cell takes the nutritional technology found to be so successful in the original Cell to a new, unprecedented level. Building upon this knowledge, Essential Cell is once again a bait that cannot be described solely as a protein, fishmeal or birdfood based bait. It is a mix of crucial dietary ingredients and food sources that carp find much easier to convert into energy and condition than standard fishmeal or bird food bases. .

Essential Opal

Based on various bird-feeds, milk proteins, high energy sources and water soluble fats, this really is a bird-food bait with a difference. It has a strong, fruity flavour in the actual base mix giving the bait the ability to overcome what are generally termed 'bottom' smells such as weed and in particular silt. It can be used with any flavours or additives in the Mainline range, and although aimed at the longer-term use, it will invariably catch from its first introduction due to its unique and remarkable smell.

Activ-8

It is neither a fishmeal, bird food or milk protein mix, but contains eight active ingredients, some of which we believe have not before been used in carp baits. This is a superb all year round bait, being nutritional but easily digested. To be used with the Activator.

Essential Fish

Using attractors from both the Essential Opal and Liver and Marine Baits, the Essential Fish Mix is a fishmeal different to any others. It contains the powdered feed inducing agents, palatants and the fruity edge of the Opal, making it a great bait even without added flavours. Alternatively the Profile Plus flavours or liquid additives can be used to enhance the smell and taste of the base mix.

High Leakage 50/50

One of the most popular and cost effective base mixes, comprising a blend of carbohydrates and proteins. As the name suggests it has an extremely high leakage rate, balanced with a neutral flavour and a taste. As it has no real 'handle' of its own, it is best used with a combination of the liquid amino based additives, flavours and sweeteners.

Hybrid

Hybrid, the latest in our long line of dedicated base mixes, truly is a bait like no other. Take the smell for example, like many of our food source baits you just can't put your finger on what it is – you just know it smells...well carpy. Being neither an out-and-out fishmeal, high-protein nor bird food type bait; the style of this bait is typified by the name Hybrid. As it is the true combination of the very best ingredients and elements of bait design. It is quite simply the ultimate in carp food and structure to provoke a feeding response at any time of year regardless of water temperature.

Polaris Pop Up Mix

Polaris has been specially designed to take all of the hard work out of making the perfect pop-up's. Simply mix eggs and your chosen attractor and then add the Polaris straight from the tub. Once rolled, boiled and left to dry you will have the perfect pop-ups every time. One large egg makes on average 100 14 mm pop-ups with no need to microwave or bake.

Activator

These are supplied in 300ml bottles and they are a necessary part of the formulation of the Mainline base mixes. They should be used at an inclusion rate of 15ml per 500gr of the corresponding base mix. They are not designed to be used with non dedicated base mixes. They are high in attraction and liquid food source and contain the liquid triggers needed to initiate the chain reaction to 'kick start' the Mainline base mix into action.

Each tube contains approx. 250ml.

• **Activ-8 Activator** • **Multi Stim** • **Meta-Mino** • **The Fuze** • **Pro Active Pineapple** • **Cell Activator** • **New Grange** • **Hybrid Activator** • **Essential Cell**

The Mainline Dumbbell Hookers are made from the same top-quality ingredients as the all-conquering Mainline freezer bait range...

Meaning you have a selection of hookbaits that match the colour, smell and texture of your chosen freezer bait perfectly with just one small but significant difference – the shape! The non 'dumbbell' appearance of these durably firm hookbaits can provide the angler the small edge sometimes needed to outwit shy, wary carp and encourage pressured fish to feed.

Each tub contains approx. 160g.

Available in:

• **Pulse** • **Fusion** • **Activ Maple-8** • **Cell** • **Activ 8** • **New Grange** • **Hybrid** • **Essential Cell** •

Response Carp Pellets

A superb attractor to induce a feeding Response in any carp as the pellets slowly dissolve, releasing high levels of taste and attractors into the direct area in and around your hook-bait.

The **Response Pellets** are designed to be used in conjunction with boilies to create the ideal feeding situation.

5mm pellets available in 400g and 5kg bags of:

• **Activ-8** • **Pro-Active Pineapple** • **Fusion** • **Cell** • **New Grange** • **Hybrid** • **Essential Cell** •

Additives & Oils

Fosoil is a fish feed inducing oil, originally designed for the fish farming industry as a feed inducing coating for pelleted foods; it is suited to any of the fishmeal base mixes in the range at 5ml per egg.

Hempseed Oil is one of the best natural attractors for carp. Available in its extracted form Concentrated Hempseed Oil is perfect for coating/glugging your boilies, particles, pellets, and enhancing ground-baits & method mixes.

Profile Plus Flavours

A range of very concentrated flavours, only marketed by Mainline. These truly are the Rolls Royce of flavours, and give the most accurate, lingering smell we could find. Although higher priced, a little of the flavour goes a long way because of their strength, and for a concentrated flavour there is no easily detectable solvent base. They are a highly soluble range of flavours in all water temperatures and are a perfect match for any of our base mixes at any time of year.

60ml bottles available in:

• **Pineapple Juice** • **Raspberry Ripple** • **Juicy Fruit** • **Fruit-Tella**
 • **Sweet Plum** • **Strawberry Jam** • **Condensed Milk** • **Tiger Nut**
 • **Crayfish** • **Big Crab** • **Red Lobster** • **Banoffee** • **Clockwork Orange**
 • **Indian Spice** • **White Chocolate** • **Toasted Almond** • **Golden Honey**

Response Flavours

A comprehensive range of flavours, from fish to fruit or spice to savoury there is an attractor for every situation.

Generally, the bulk of flavours available today, use small amount of actual flavour on a high level of solvent base such as Ethyl Alcohol or Glycerol. These bulk solvents are the base of most flavours, but carp, such is their awareness, can easily recognise the commonly used bases. Having a variety of both flavour and base options, such as in the Response Range gives the angler two variables to prevent using common combinations and spooking wary carp.

60ml bottles available in:

• **Cherry Juice** • **Scopex** • **Milky Toffee** • **Strawberry Zest** • **Spice** • **Salmon & Shrimp** • **Tangerine Juice** • **Tutti Frutti** • **Pineapple** • **Blackcurrant** • **Mediterranean Shelfish** • **Banana & Pear** • **Hydra Sweet** • **Frankfurter Sausage** • **Aniseed Oil**

To compliment the Response Range we have the ideal sweetener in **Hydra Sweet**, which rounds off the taste of any bait.

Activ-Ades

The Activ-Ades are feed inducing flavours containing a combination of amino based attractors, taste enhancers and palatants. Imported from the United States they are used in the animal feed industry as feed inducing or triggering agents for the chemical receptors of hunger. The whole range is very water soluble, giving a very good leakage rate which in turn triggers quicker feeding responses from the carp. The Sweet-Ade is designed as the ultimate sweetener, but is still on the same base as the rest of the range.

100ml bottles available in:

• **Activ Strawberry Ade** • **Activ-Peach Ade** • **Activ Pacific Tuna Ade** • **Activ Trigger Ade** • **Activ Sweet Ade** • **Activ Maple Ade** • **Garlic Ade** • **Squid Ade** •

Active Ade Particle & Pellet Syrups

Pro-Activ Particle & Pellet Syrups have been specifically formulated to draw fish into the baited area and induce a competitive feeding response. The thick, syrupy liquid is designed to be denser than water, dispersing as it reaches the bottom and spreading in a highly attractive cloud.

Pro-Activ Particle & Pellet Syrup contains liquid palatants, aminos and natural sugars all of which are highly effective and well proven feeding stimulants. The Syrup is convenient, easy to use and completely water soluble. Designed to boost the attraction of prepared particles or pellets and to be a highly effective ground-bait additive. Suitable for Carp Tench Bream and Roach.

Recommended dosage is 10 ml per 1kg, but the natural attractors used make it impossible to overdose.

500ml bottles are available in:

• **Condensed Coconut Milk** • **Activ 8** • **Halibut** • **Pineapple Juice** • **Tiger Nut** • **Bloodworm** • **Essential IB** •

Stick Mix Liquids

These new Stick Mix Liquids are totally PVA friendly and designed to be used throughout the year in all water temperatures. Thereby providing the angler with increased possibilities and options to boost the attraction of a multitude of baits, methods and presentations.

Not only can these liquids be used to give boilies, pellets and particles added attraction, but being PVA friendly they can be used in Stick Mixes and PVA bags. These versatile liquids can be added directly to the mix and also applied to the outside for maximum leakage.

Suitable for carp tench bream and roach. Easy to use easy and completely water soluble making it impossible to overdose.

PVA friendly

500ml bottles are available in:

• Hybrid • Cell • Banoffee • Essential Cell • Belachan Black

High Impact Ground Bait

These ground-baits contain high quality food ingredients and will sustain rather just stimulate a feeding response. They can be used for carpet feed, method fishing, carriers for particles and pellets and as an added extra for stick mixes. The resulting mix is highly attractive and extremely effective, giving rapid dispersion of attractors into the water column.

2kg buckets available in:

• **Fish • Nut • Pineapple • Hemp • Indian Spice • Cloud9 • Cell • Hybrid • Essential Cell • Souper Zig • Belachan Black •**

MATCH RANGE

After the success of Mainline Baits in the carp fishing world across Europe, it was only natural that we evolved into coarse and match baits. At Mainline, we pride ourselves on using the best quality ingredients, and have spent a lot of time researching the enhancers and stimulants that fish respond to in different conditions. In recent years, we also marked the fact that many top-end matchmen were using Mainline carp baits within their fishing. By combining our experience and knowledge of ingredients with the angling brains of the expert Guru Match Team, the Mainline Match Range was born. Over time, the team has tested and fine-tuned each bait, working on essential factors of ingredient ratios, colour, texture, and breakdown. The bespoke mixes are easy to use straight from the bag, and with the Guru Match Team on board, we aim to advance the range to meet the demands of modern anglers.
